The Science of Personalized Comfort

TEMPUR material is truly one of a kind — often imitated, but never duplicated. Millions of individually adjusting TEMPUR cells work together to keep each guest comfortable, each and every night.

Pressure & Motion Absorption

TEMPUR cells absorb body weight and movements to help relieve painful pressure points, reduce tossing and turning, and help your guests sleep more soundly.

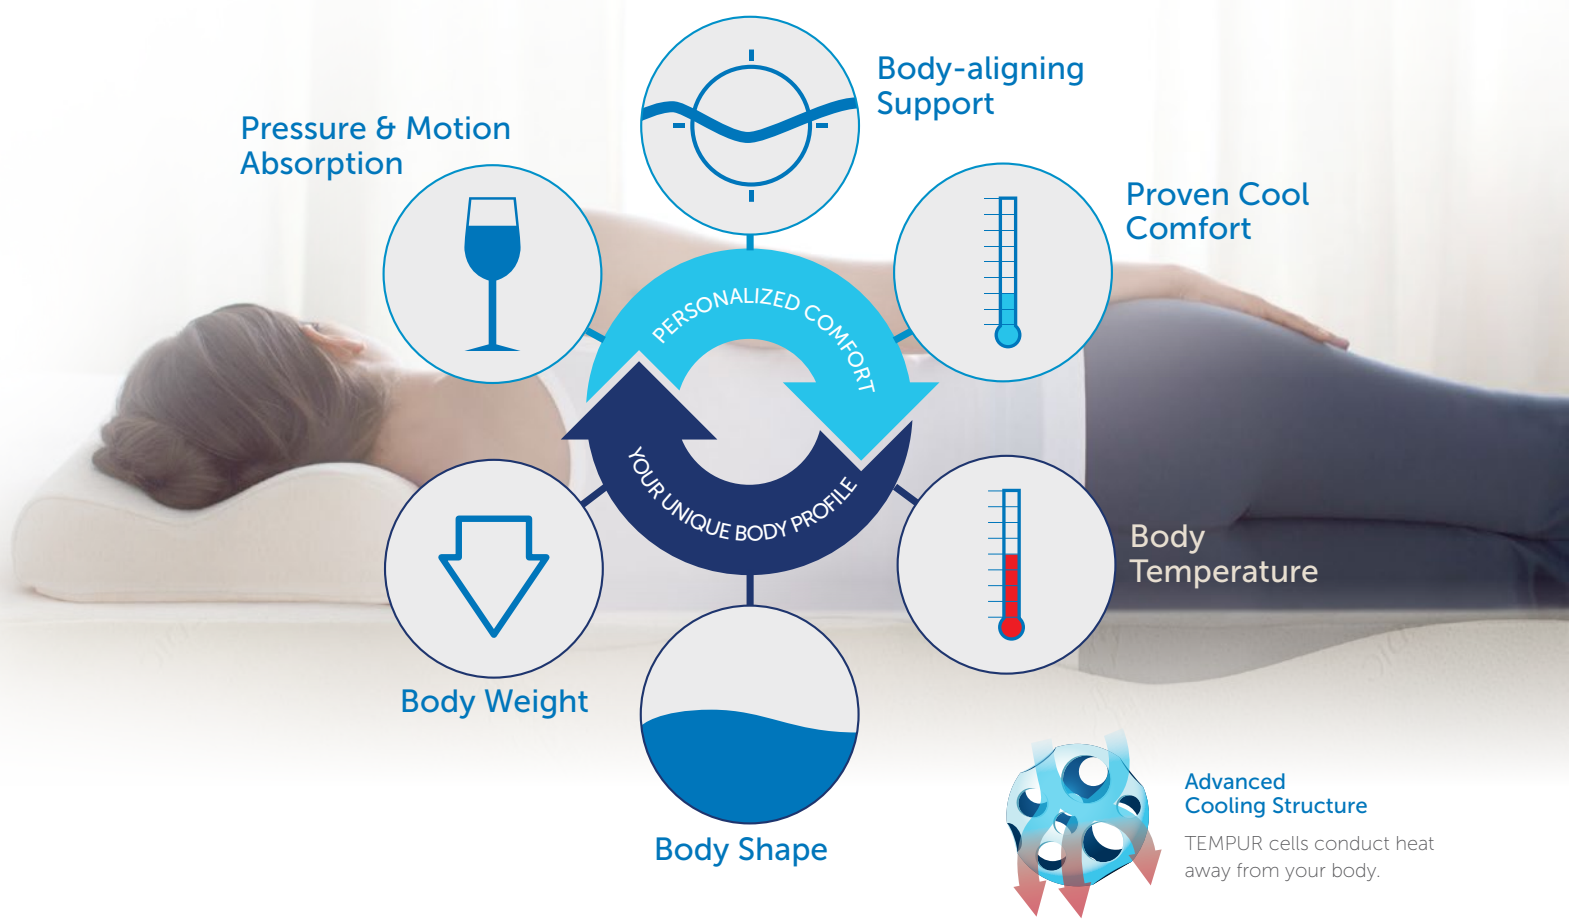

Body-aligning Support

TEMPUR cells continuously sense each guest's unique body weight, shape and temperature to conform more precisely to their body instead of hammocking.

Proven Cool Comfort

TEMPUR cells feature an advanced cooling structure that continuously conducts heat away to keep your guests cool and comfortable throughout the night.
